

Regulatory Compliance Specialist

DELFT, THE NETHERLANDS

About Meatable

We are on a mission to make 100% real, delicious meat, without the negative impact on our climate and the need to raise and slaughter animals.

The Meatable approach for creating 'cell-based' meat is based on ground-breaking proprietary technology that was developed at The University of Cambridge and allows us to turn induced pluripotent stem cells (iPSCs) into muscle and fat cells, creating 100% real, delicious, guilt free meat. We use iPSCs because they have amazing benefits that enable affordable, at scale production (e.g. they are pluripotent, grow completely serum free, have unlimited proliferation capacity and can grow in suspension). With our technology, scalable cell-based meat production is becoming a reality.

We are a young and fast-growing company and are entering our next wave of growth. Given our size, new team members will be a huge part of our motivated multidisciplinary team. Our culture encourages everybody on the team to actively shape their position and we provide ample opportunities for personal and professional growth.

Regulatory Compliance Specialist

DELFT, THE NETHERLANDS

About the role

We are seeking an experienced and motivated Regulatory Compliance Specialist to join our growing RA/QA team!

You will ensure the regulatory compliance of the product portfolio with our procedures, local regulations, standards and legislation, all with focus on the innovation projects. This will include the pre-market authorisation, the product launch and (in the future) the ongoing product market compliance in the EU, US, etc.

You will carry out the regulatory and food safety risk assessments of the product design and innovation at the early stage of the projects. Next to that you will be an essential part of our multidisciplinary team to whom you will provide the regulatory input during the entire R&D process and in preparation for and throughout the product pre-market authorisation process.

In parallel you will identify the regulatory compliance opportunities and challenges, propose the solutions, the action plan, and partner with our teams on their implementations. To do so you will (co-)create the company regulatory standards and deploy them across the business.

Our new team member is a hands-on, detail oriented person who is able to carry out the regulatory and food safety assessments. Next to that he or she is looking for an opportunity to make a real difference and impact in the way we produce meat.

Sounds like you?

Regulatory Compliance Specialist

DELFT, THE NETHERLANDS
